**W**hen it comes to planning for college, there's a connection between what classes you take in high school and your future college major. Figuring out what you like doing most, plus what you're best at, can point to the careers you should consider—and what majors will help you reach your career goal. The majors and careers listed below are only a small sample of the hundreds of possibilities that you can explore. Find what your likes and interests are to see what related college majors, apprenticeships and careers you might consider.
