Help! What should My **Major** be?

1. If you could go to a high school that taught only one class all day and all week long, what class would you want it to be? *(Don’t write “Lunch”!)* Why did you choose that class?

2. What activities might make you late to dinner? *(Passive activities such as TV-watching, purely recreational activities such as video games or purely social activities such as talking on the phone don’t count.)*

3. Which would you most enjoy working with: ⬜ data, ⬜ people or ⬜ things?
   
   Give an example of something successful that you’ve done with this kind of work.

4. Which would be your second choice to work with: ⬜ data, ⬜ people or ⬜ things?
   
   Give an example of something successful that you’ve done with this kind of work.

5. Pretend you could go to one room on a college campus and choose one person who would have to go to lunch with you. In which room would you find the most interesting person for lunchtime conversation? *(Check one.)*

   - a lecture hall in the psychology building
   - a chemistry or biology lab
   - the library
   - the computer center
   - the gym
   - a studio or stage in the arts building
   - a chaplain’s office
   - a classroom where they’re discussing business

6. Think about how the following 12 characteristics would make your future job more or less satisfying. Then give each one a number from 1 to 12, using 1 for what you want most, 2 for what you want second-most, and so forth, all the way to 12 for what you want least. You must use all the numbers from 1 to 12, and no ties are allowed.

   - High income
   - Frequent change of scene
   - Leading or influencing other people
   - Freedom to make your own decisions
   - Variety in work tasks
   - Job security
   - Low stress
   - Physical activity
   - High status
   - Working by yourself
   - Predictable work hours
   - Working by yourself
